**Subject: 2026 Street Reconstruction Project, City Project ST269001
Additional Soil Borings/Testing**

Dear Property Owner,

As part of planning for the 2026 Street Reconstruction Project, **soil borings/testing** will take place on City-owned land adjacent to your property in **August 2025**. This testing will help our design engineer better understand subsurface conditions and prepare for future construction.

The work will be completed by the City's consultant, Braun Intertec. For more information and project updates, please visit plymouthmn.gov/2026StreetRecon. Weekly or bi-weekly construction updates will be posted once construction begins. You can also sign up for email notifications on the webpage.

If you have any questions about the soil testing or the overall project, please feel free to contact me or Nick Amatuccio, the City's Design Engineer, using the contact information below.

Sincerely,

A handwritten signature in black ink that reads 'Tony Miller'.
